17 April 1964

MEMORANDUM FOR: [REDACTED], Development Branch  
Plans and Development Staff

SUBJECT : PAR 208 [REDACTED]

1. PAR 208 [REDACTED] is concerned with image enhancement of small scale photography. A memorandum for the record issued by me on 31 January stated that disposition of this project would be prepared by 30 April 1964.

2. It has been ascertained that [REDACTED] tends to exploit adjacent effects in connection with this PAR. EDL Branch has a project underway which purports to do the same thing. The manner in which these effects will be measured and interpreted is a process not presently utilized by [REDACTED] [REDACTED] coherent optical analysis. I believe that the EDL results may be more meaningful in the long run, and I feel we should continue basic work in that area.

3. Unless it is felt that duplication is necessary, or that [REDACTED] work would be more immediately useful, I suggest we cancel PAR 208 all together, and apply the allocated funds to another PAR.

[REDACTED]  
Chief, Exploratory Development Laboratory  
P&DS
